

!!! The information will be valid only if there is no bell at the top of the screen !!!

GPS activation

Switch on/off

The bell 🛎️ : Satellites reception indicator. Appears during a few seconds after switch on. If **blinking or not disappears**, check that the antenna and its cable are connected and not damaged.

The battery 🔋 : Must appear. If **blinking**, there is a bad connection to the power supply of the vehicle.

Odometer function ODO

Automatic adjusting at each waypoint (except WPC).

TOTAL direct adjusting in hundreds meters

PARTIAL reset to 0

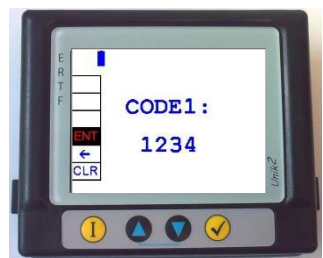

Backward (Odometer decrementing)

Daily code

4 digits code given by organization.

Unlock the stage of the day.

To enter the code:
 - Select COD +
 - Select CD1 +
 - Enter the code using the arrows and validate each number
 - Validate the code by ENT
 - Press I to come back to the main screen

Speed limit

Symbol 🛑 When appears, the GPS checks the max speed

Symbol ⚠️ (DZ), the GPS:
 - check the speed in the area (30, 50 or 90 km/h).
 - blinks, rings and registers if overspeed.
 It stops when the waypoint FZ is reached.

Navigation: Press to go to this page

Navigation information in the visibility radius of the target waypoint or for a visible waypoint:

COG : Course followed by vehicle
 CTW: Direct course to the waypoint
 Arrow: indicates the direction to follow to the target waypoint
 DTW: Direct distance to waypoint in km

Releasing code WPM

Given by organization (PC course). Using it pulls a penalty.

Select COD and then WPM to turn hidden waypoints into visible waypoints and so to have all the navigation information.

Navigation Information concerning WPM (masked waypoints) when outside unhidden radius:

Name of the target waypoint
 Number of the target waypoint
 COG : Course followed by vehicle

A waypoint is validates when the vehicle is in the radius defined for this waypoint (300m, 200m, 90m or 50m). The GPS switches automatically to the next waypoint.

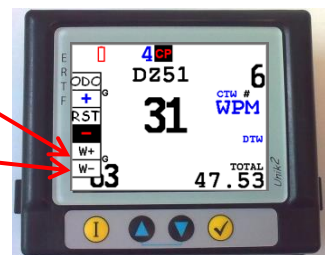

Skip a waypoint

If a waypoint can't be reached or if you don't want to reach it, press NXT on the INI screen:

W+ : to go to the next waypoint

W- : to come back to the previous waypoint

Take more importance to the waypoint's name instead of its number.

!!! The information will be valid only if there is no bell at the top of the screen !!!

Sentinel function

Overtaking

Somebody wants to overtake you: **you hear**
Beep beep beeeep – Beep beep beeeep
 Get ready to let the vehicle pass a.s.a.p.
